

FUNCTIONALITY

- drag & drop (video, mp3 or feed)
- open file (video, mp3 or feed)
- open url (video, mp3 or feed)
- 'about' (links to LongTailVideo)
- minimize/maximize/close
- resize (bottom right corner)
- resize playlist (line left of playlist)
- LTAS plugin (ads)
- PIXCY plugin (search + recommend)

INFO

The entire default player is used, so no duplicate code is needed.

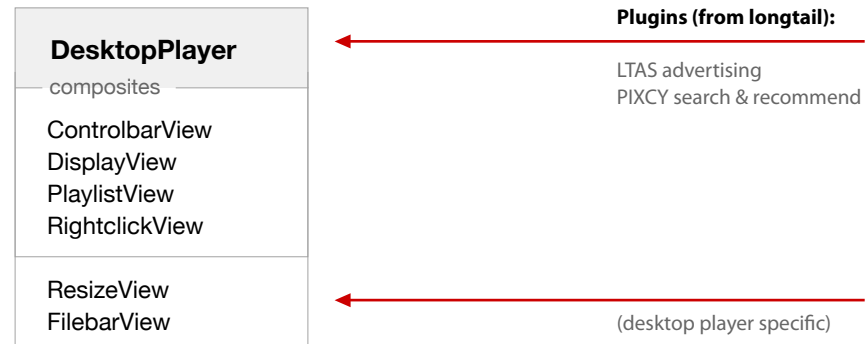

Files can be dropped on the player. There's also a button to open a file/url. Functionality for this is in the **FilebarView**.

The player can be minimized, maximized, and resized. Code and handlers for this is grouped in the **ResizeView**.

The **PIXCY** plugin is visible when a video is not playing (on startup, pause, completed).

The **LTAS** plugin can be loaded to serve ads when content from pixcy is served.
